INTELLIGENCE RESEARCH AND DEVELOPMENT COUNCIL
Electromagnetic Intercept and Position Fixing
for
Military Operations Subcommittee

TERMS OF REFERENCE

OBJECTIVE: The Task Force will identify the total spectrum of programs and pertinent research and development efforts related to electromagnetic intercept and position fixing for military operations and recommend what can be profitably done to integrate the RDTE efforts of all involved agencies.

SCOPE: To achieve the stated objectives, the Task Force activities will include:

1. Review current concepts of electromagnetic intercept, position fixing, data reduction, and distribution for support of military operations.
2. Review and appraisal of the programs of all agencies. This will include:
 - a. Current operational programs oriented to electromagnetic intercept and position fixing at national and tactical levels.
 - b. Present technology and development programs to support the requirements.
3. Identification of capability not adequately addressed by present R&D efforts.
4. Identification of research and development programs that can be effectively integrated to reduce the level of total allocated resources.
5. Recommendation on priorities for current, required, and proposed integrated research and development efforts necessary to effectively support the requirements of field commanders.
